Humanoid Robot Prices & Deployment Status

The November 2026 verified table. Every price comes from the manufacturer's own store, order page, or regulatory filing. Every deployment claim is tiered by evidence, not by press release.

EDITION 2026-11 PRICES RE-CHECKED 03 NOV 2026 DEPLOYMENT BOARD 18 AUG 2026 THERESAROBOTFORTHAT.COM

RULE 1 · PRICES

A price appears here only if the maker publishes it on its own property or in a filing. Reseller listings, aggregator guesses, and LLM answers never qualify.

RULE 2 · DEPLOYMENT TIERS

Tier 1 Deployed: named arms-length customer in ongoing operation. Tier 2 Piloting: named external pilot. Tier 3 Demoing: public demonstrations only.

RULE 3 · HONEST GAPS

"No published price" is a verified finding, not a shortcut. It means the maker's store, order paths, and filings were checked and none discloses a figure.

Verified manufacturer prices

All figures are the maker's own published list prices as of 3 November 2026. Purchase prices unless marked otherwise. FX conversions state their source and date.

ROBOT	MAKER	FORM	PUBLISHED PRICE	PRICE SOURCE	DEPLOYMENT STATUS
Unitree R1 AIR	Unitree	Bipedal	**$4,900**	Unitree store	TIER 3 · DEMOING
Unitree R1	Unitree	Bipedal	**$5,900**	Unitree store	TIER 3 · DEMOING
Weave Isaac 1	Weave Robotics	Wheeled	**$7,999 or $449/mo**	Weave order page	TIER 2 · PILOTING
Agility Digit	Agility Robotics	Bipedal	**$8,500/mo RaaS**	Agility investor deck (SEC)	TIER 1 · DEPLOYED
Unitree R1 EDU	Unitree	Bipedal	**$10,500**	Unitree store	TIER 3 · DEMOING
Unitree G1	Unitree	Bipedal	**from $13,500**	Unitree store	TIER 2 · PILOTING
1X NEO	1X Technologies	Bipedal	**$20,000 or $499/mo**	1X order page	TIER 3 · DEMOING
Menlo Asimov 1	Menlo Research	Bipedal	**$20,000 (kit)**	Menlo product page	TIER 3 · DEMOING
AGIBOT X2 Neo	AGIBOT	Bipedal	**$25,600**	AGIBOT store	TIER 3 · DEMOING
Unitree H2	Unitree	Bipedal	**$29,900**	Unitree store	TIER 3 · DEMOING
AiMoga Mornine M1	AiMOGA (Chery)	Bipedal	**CNY 285,800 (about $43,000)**	AiMOGA store on JD.com	TIER 3 · DEMOING
AGIBOT A2 Lite	AGIBOT	Bipedal	**$44,560**	AGIBOT store	TIER 3 · DEMOING
Unitree H1	Unitree	Bipedal	**$90,000 (see notes)**	Unitree store	TIER 3 · DEMOING

Notes: G1 price excludes tax and shipping; NEO orders take a $200 refundable deposit, Isaac 1 a $250 one. AiMoga USD figure uses the ECB reference rate of 6.6483 CNY/USD on 2 Nov 2026 (6.7046 on 2 Oct 2026), so the conversion moves from about $42,600 to about $43,000; the CNY figure itself is unchanged. Changes since the October edition, re-verified on the makers' own pages on 3 Nov 2026: the twelve October prices were confirmed unchanged on each maker's individual product or order page. AGIBOT X2 returns to this page after its re-audit: the base X2 is now sold under its type designation X2 Neo, the same store entry, at $25,600 (previously $24,240 as "X2"). EngineAI T800 stays on page 2: the maker no longer publishes a T800 price. Unitree still titles the H1 listing "contact us for the real price", so treat $90,000 as a nominal list figure. Agility's $8,500/mo RaaS rate is a footnote assumption in its investor deck filed as an SEC exhibit, not a published rate card. Tier badges come from the TARFT deployment board (18 Aug 2026, 58 robots); NOT TIERED means not yet on the evidence board. AGIBOT A2 Lite carries the A2 line's tier.

THE PART THE HEADLINES SKIP

Tracked robots without a verified published price

These are the most searched humanoids, and none carries a maker price we could verify this month. Whoever quotes one anyway is quoting a guess. The deployment tier tells you how real each program is on the evidence.

ROBOT	MAKER	FORM	PRICE REALITY	DEPLOYMENT STATUS
Figure 02	Figure AI	Bipedal	No price, partner deployments only	TIER 1 · DEPLOYED
Figure 03	Figure AI	Bipedal	No price, no pre-order	TIER 2 · PILOTING
Apptronik Apollo	Apptronik	Bipedal	Enterprise contact process, no list price	TIER 2 · PILOTING
UBTech Walker S2	UBTech	Bipedal	Contact sales, no unit price	TIER 2 · PILOTING
UBTech Walker S1	UBTech	Bipedal	Contact sales, no unit price	TIER 2 · PILOTING
Hexagon AEON	Hexagon	Wheeled	No published price	TIER 2 · PILOTING
Foundation Phantom MK-1	Foundation	Bipedal	No published price	TIER 2 · PILOTING
Humanoid HMND 01	Humanoid	Wheeled	No published price	TIER 2 · PILOTING
Kepler Forerunner K2	Kepler	Bipedal	No published price	TIER 2 · PILOTING
EngineAI T800	EngineAI	Bipedal	List price withdrawn: no T800 price on the maker's international or Chinese page since late Sep 2026; Buy Now leads to a JD.com search with no verifiable maker listing	TIER 3 · DEMOING
Galbot G1	Galbot	Wheeled	No published unit price; CATL engagement is related-party, excluded from tiering	TIER 3 · DEMOING
Leju Kuavo-5	Leju	Bipedal	No list price; IPO prospectus discloses CNY 308,100 as the 2025 series average realized price	TIER 3 · DEMOING
Boston Dynamics Atlas	Boston Dynamics	Bipedal	Early-adopter program, no price	TIER 3 · DEMOING
Tesla Optimus	Tesla	Bipedal	No product page, no price, no spec sheet as of 3 Nov 2026 (product URL returns 404)	TIER 3 · DEMOING
XPENG IRON	XPENG	Bipedal	No published price	TIER 3 · DEMOING
Neura 4NE-1	NEURA Robotics	Bipedal	No published price; reservation page live	TIER 3 · DEMOING
Astribot T1	Astribot	Wheeled	Earlier CNY 89,900 listing left the maker's site; no current published price	TIER 3 · DEMOING
AGIBOT X2 Ultra	AGIBOT	Bipedal	Store entry shows 999,999 placeholder metadata and "Contact Us", not a price	NOT TIERED
Menlo Asimov 2	Menlo Research	Bipedal	Announced only, no published price	TIER 4 · PAPER

How to read this

Only two humanoids clear the bar for a verified arms-length deployment as of the August 18, 2026 board: Agility Digit and Figure 02. The loudest wheeled "deployment", Galbot running CATL lines, is a related-party engagement (CATL is a Galbot investor) and is excluded from tiering. Everything else the market calls "deployed" is, on the published evidence, piloting or demoing. The gap between claimed and verified is exactly where buying decisions go wrong, and it moves monthly.

Method: PRICE-RESEARCH-PROTOCOL (manufacturer-property prices only, seven documented miss paths checked before "no published price" is written). Deployment tiers computed from 490 sourced, dated events; related-party deployments are flagged and excluded from tiering. This is a verified minimum, not an estimate.

This table changes as prices move and pilots convert. The free newsletter carries the monthly delta at **news.theresarobotforthat.com**
